The instructor was responsive to my questions.	10 91%	1 9%	0 0%	0 0%	0 0%	4.9	0.3	5.0	11
Effective use of audiovisual materials was utilized by the instructor.	9 82%	2 18%	0 0%	0 0%	0 0%	4.8	0.4	5.0	11

## Course Comments.

NA

---

The last two weeks of the class had a lot of more content and work compared to the 2 or 3 weeks before that, especially when Midterm 2 is scheduled on the last day of the course.

---

It was very well designed and well planned course other than the homework deadlines . The best aspect was that it was more on a practical side i.e. implementation of all those quantitative stuff learnt in the EPI 202 and EPI 203.

---

The class felt a bit rushed at the end of the quarter, but otherwise I thought this class was taught at an appropriate level. Sometimes felt a little disorganized (although I understand that this is the second time being taught this way). Maybe one suggestion would be to spend 1-2 fewer days on linear/ logistic regression to make a little more room for survival analysis/ Cox PH models. I also greatly appreciated the instructor's willingness to venture into topics covered in other courses to help try to synthesize the information for students. Both the instructor and TA were very approachable and responsive to questions, and I appreciated the extra set of office hours offered per week.

---

The schedule of the class should be planned in a better way. Definitely felt very rushed at the end of the quarter.

---

Everything about this class was spectacular! Both TA and instructor went beyond their way to help us and I'm really grateful for that!

---

I definitely would have preferred less emphasis on R and more handwritten homework. I learn better when I physically write things out.
